

Guide to the Index

To save space and cost we have omitted from the index:

1. Names in family pictures and the in the family section, but we included the donors of those pictures.
2. Names of children in School Pictures, unless the student is in other places in the book. Names of the donors are included.
3. Names in Alphabetized lists, as a quick scan of the list would show the research who is included.
4. Place names unless in the vicinity assuming only area communities would interest the researcher.
5. Names on Maps, because the researcher of a family would likely have an idea where the property was located.
6. For the Family section we indexed names only and only of the settler parents and their children's spouses. We did not include spouses if they are from those families included in the book.

Since this index is not manually done, but indexed by the computer it picks up the names regardless where they appear.
